Hull Material	GRP
Engine	1 x Yanmar 20hp
Builder	Luffe Yachts ApS
Designer	Oluf Jørgensen
Accommodation	6 berths in 2 cabin + saloon

BROKER'S COMMENTS

Now we're talking about a performance yacht with attitude and style! The sleek hull of the Luffe 3.6 gives the illusion of being small but hides a comfortable and spacious interior. The cabins are designed for life onboard and are also very comfortable. This aesthetic and modern design is something you only find in a Danish performance boat.

The Luffe 3.6 is easy to handle and offers extremely high stability. LIVIER has also been upgraded with a stunning carbon fiber rig from Southern Spars and comes with a full regatta sail set from North Sails. Halyards and sheets are easily accessible, and the cockpit has been optimized for maximum sailing enjoyment. The Luffe 3.6 features an integrated self-tacking jib track like its larger sister, the Luffe 40.20.

The interior, made of high-gloss varnished mahogany, is of the highest quality and creates an exciting contrast with the dark cushions. The saloon offers two sofas where the backrests can be removed to create wider berths. The forepeak and aft cabin both have spacious double berths. On the port side of the companionway is the galley, and on the starboard side is the navigation station, with a bright and spacious head aft of it.

The Luffe 3.6 is not an "ordinary" boat—it's for someone who truly loves sailing and appreciates world-class design. This model is very rare on the pre-owned market, and we invite you to an exclusive viewing.

Key Facts:

- Carbon fiber mast and boom from Southern Spars, white-lacquered.
- Rod rigging.
- Furler TD with self-tacking jib track.
- North Sails regatta sails.
- Retractable bow thruster.

OWNER'S COMMENTS

"Slender is fast," coined Oluf back in the day when he built racing boats. When I saw the new model from Luffe, I immediately knew this was the boat I wanted. With its sleek hull, the Luffe 3.6 is a perfect boat for the Swedish coastline, where you need to point high on the upwind leg and make quick tacks. With a lightweight boat, upgraded with form-stable laminated sails and a carbon fiber rig, you'll want to sail in the "fast lane." The boat is very easy to drive, and my motto has always been to get from

marina to marina as quickly as possible, something she has definitely achieved. I have mostly sailed along the Swedish west coast but have also quickly crossed the Kattegat for visits to Skagen and Læsø.
